

## VisoTech – Energy Trading Reinvented

Since 1999 VisoTech has offered innovative software solutions for depicting, automating and optimising business processes in the energy industry. Renowned customers from across Europe have relied on our solutions for many years. With our autoTRADER, we are the European market leader in algorithmic short-term power and gas trading. We are looking for experts who can advance the development of our products with us and can help us to stay ahead of the competition with new ideas and approaches. We offer an exciting working environment in a highly professional and agile team with a start-up culture, the use of the latest technology and current topics, such as machine learning and artificial intelligence.

## Software Engineer – Automated Trading (m/f) wanted to strengthen our innovative team

### Your tasks:

- Together with our team of developers you will implement customer-specific and standardised system parts.
- You will design user interfaces, data interfaces or complex algorithms depending on your individual strengths.
- You will predominantly work independently on project sections within our agile software development process.
- You will bring your own ideas and approaches to problems to the position.

A selection of the technology we use:

- Mainly Python
- ØMQ
- RHEL / CentOS
- MongoDB

### Your profile:

- You possess particularly good analytical skills, pragmatism, humour and enjoy developing
- Outstanding knowledge of Python or another relating programming language
- As a team player, you also enjoy solving problems independently
- You are not daunted by seemingly unsolvable tasks

**We offer:**

- A free choice of your development environment.
- We place great importance on an undisturbed working environment, therefore we have a maximum of two people in an office.
- We provide free lunch, coffee, a table football table, bike room and shower for our employees.
- We additionally support our employees through targeted education and further training.
- We celebrate our successes together and organise various events for our employees.

The minimum salary for the position is €45,000 p.a. Your actual yearly income will be determined according to your qualifications and experience in line with market norms. You can find more information about our company at [www.visotech.com](http://www.visotech.com).
